

JY Liu

Solutions Architect | Technical Lead | Hands-On Full Stack Delivery

📍 Kuala Lumpur, Malaysia ✉️ ljieyao0210@gmail.com ☎️ 016-411 0281 🌐 ljieyao.com 📺 ljieyao 📺 ljieyao

Summary

- Solutions architect and technical lead with 11+ years of experience delivering web, mobile, cloud, and integration-heavy platforms across fintech, SaaS, banking, consular, and enterprise environments.
- Hands-on across frontend, backend, APIs, DevOps, and cloud infrastructure, with a consistent record of taking products from discovery and architecture through production delivery.
- Uses AI tools pragmatically to accelerate analysis, implementation, prototyping, and delivery quality while maintaining production-grade technical rigor.

Experience

Gembira Bina Sdn Bhd, Senior AI / Full Stack Engineer

Kuala Lumpur, Malaysia

- Built and shipped **HappyAI** (MVP COMPLETE v1.0.0), an AI-powered tender BQ extraction, validation, and T1121 xlsx generation platform — Next.js + **FastAPI** + SQLite with Groq LLM primary / Ollama fallback.
- Implemented a confidence-badged review UI (green/yellow/red thresholds), batch folder ingest CLI for headless operation, and a deterministic document processing pipeline.

May 2026 – present
4 months

AvaEra, Senior Full Stack Developer

Remote

- Architected and led delivery for **AvaEra's** MLM compensation platform, modernizing the legacy stack into a pnpm + **Turborepo** monorepo with **Next.js 16**, **Prisma 7**, and **PostgreSQL 18**.
- Engineered a 15-service reward engine covering direct sponsor, team bonus, pool sharing, and merchant profit share — all admin-configurable via the /admin/config surface, not hardcoded.
- Delivered sub-products including the **DaiseE Beauty Series** compensation plan amendment and the **DaiseE Leader** inventory credit + redemption lifecycle, with end-to-end **Playwright** e2e coverage.

Apr 2026 – present
5 months

Vailley AI Solution Ptd Limited, Team Technical Lead

Singapore

- Leading cross-functional delivery for **VFS Global's** visa and consular platforms, combining solution architecture with hands-on implementation across application, integration, and data workflows.
- Delivered a Consular Dashboard with RBAC and ABAC controls, an ADR portal with structured document submission, ETL-backed operational visibility, a digital corporate visa platform for agents, and SAP Concur to OneVasco integration for **VFS Global**.
- Built a parallelized multi-file **PDF scanner** microservice for consular document processing, with pre-warmed S3 clients, deterministic file ordering, and dedicated e2e test coverage.

June 2025 – present
1 year 3 months

Shift Markets, Senior Typescript/PHP Developer

Remote

- Lead engineer for **CXM Direct** (worldwide multi-asset trading platform) and CRM initiatives, owning backend delivery with ThinkPHP and frontend execution with TypeScript, React, and Next.js.
- Engineered a **Unified Payment Gateway** integrating 20+ global Payment Service Providers (PSPs), unifying fragmented payment workflows into a single scalable infrastructure.
- Improved system reliability and delivery speed through architectural cleanup, performance tuning, and production-oriented engineering practices.

Jan 2023 – present
3 years 8 months

Internet Brands, Senior Web Engineer

Malaysia

- Engineered Laravel microservices and backend improvements for large-scale product workflows, strengthening response times and concurrency handling.
- Operated Kubernetes environments with Helm and Rancher and improved data processing pipelines with Kafka and PostgreSQL optimization.

Apr 2023 – Sept 2024
1 year 6 months

MaiDaLv , Senior Full Stack Developer Delivered Spring Boot, UniApp, Vue.js, and Python-based product workflows covering sub- scriptions, WeChat integration, and IP-risk analysis.	Remote Feb 2025 – Apr 2025 2 months
Cake Experiential Communications Asia , Solutions Architect - Owned architecture and delivery for Vue.js and Laravel platforms used in regional enterprise and campaign engagements. - Introduced stronger engineering standards including TDD, API governance, and backend scal- ing practices for client-critical systems.	Kuala Lumpur, Malaysia Apr 2021 – May 2023 2 years 2 months
Glints , Web Software Engineer - Built full-stack recruiter tooling for Superpowered using Next.js and Koa.js, with emphasis on workflow efficiency and usable internal product design. - Improved dashboard responsiveness and release quality through better testing and deploy- ment automation.	Remote Jan 2022 – Dec 2022 1 year
InnoLab Global , Senior Information Technology Consultant - Delivered cross-platform products across Angular, Ionic, Flutter, Firebase, and AWS while automating cloud delivery workflows and mentoring junior developers. - Shipped the Forest City Super App production MVP (90% complete) on a Turborepo + Next.js + Prisma 7 + PostgreSQL 18 + Auth.js v5 stack covering community, events, payments, partner portal, admin console, and mini-app runtime. - Built Aegis Shooting Academy (ASA) digital platform end-to-end with NestJS + Prisma back- end, Next.js admin dashboard, and React Native/Expo mobile application. - Delivered a corporate website and WooCommerce product catalogue for 3V Malaysia (furni- ture manufacturer) using Docker Compose with a premium Apple-inspired theme direction.	Kuala Lumpur, Malaysia Sept 2018 – present 8 years
The Consociation LLP , Information Technology Consultant Led full-stack delivery for products including iHeartCity and Swiiipe using Angular, NestJS, GraphQL, and Firebase with AWS-based DevOps automation.	Singapore Sept 2016 – present 10 years

Selected Projects

Unified Payment Gateway Specialized payment infrastructure unifying 20+ global Payment Service Providers (PSPs) into a single, high-concurrency API layer. - Architected and delivered a unified integration layer for diverse PSPs, handling complex trans- action workflows, reconciliation, and automated settlement. - Expanded regional coverage in 2026 with OmPay (IDR qris/va/dana, MYR duitnow per FpxAPI \$5.1/\$8.0), NexusPay chain callbacks, and PH bank-code refresh workflows. - Secured financial operations through strict audit logging, sensitive data isolation, and robust error-recovery mechanisms.	Jan 2023 – present
VFS Global Consular Platform Mission-critical visa and consular services platform delivering digital transformation for global diplomatic missions. - Delivered a high-security Consular Dashboard with granular RBAC/ABAC and integrated SAP Concur for automated expense and travel management. - Built a digital corporate visa platform enabling agents to manage large-scale applications with real-time tracking and ETL-backed analytics.	June 2024 – present
Superpowered Talent platform delivered with scalable web architecture, backend APIs, GraphQL, PostgreSQL, and event-driven workflows. Built a responsive Next.js and Koa.js application with GraphQL integration, backend optimiza- tion, and scalable recruiter-facing workflows.	Jan 2022 – Dec 2022

Buddy System Asia

Sept 2016 – Jan 2024

Large-scale MLM operations platform covering hierarchy management, rewards, inventory, redemption, and real-time operational workflows.

- Architected Angular and Laravel workflows for hierarchy, rewards, redemption, inventory, and real-time operational updates at scale.

Education

MBA	University of Malaya , Business Analytics	Kuala Lumpur, Malaysia Oct 2023 – Oct 2026
MCompSc	University of Malaya , Mobile Cloud Computing	Kuala Lumpur, Malaysia Jan 2011 – Jan 2013
BEng	Universiti Sains Malaysia , Software Engineering	Malaysia Jan 2008 – Jan 2011

Skills

Full Stack Engineering: TypeScript, JavaScript, PHP, Python, Java, Laravel, ThinkPHP, React, Next.js, Angular, Vue.js, NestJS, Node.js, Spring Boot, Flutter, Ionic

Architecture, Cloud & DevOps: Solution architecture, AWS, GCP, Firebase, Docker, Kubernetes, Helm, Rancher, CI/CD, deployment automation, integration-heavy platform delivery

Backend, Data & Integration: PostgreSQL, MySQL, Redis, Apache Kafka, GraphQL, REST APIs, microservices, ETL workflows, event-driven and serverless systems

AI-Enabled Delivery & Multi-Agent Systems: Expert at orchestrating LLM-based agents, RAG (Retrieval-Augmented Generation), prompt engineering, and custom GPT development to accelerate product delivery while maintaining technical rigor.
